BOVIET SOLAR

COMPANY | OVERVIEW

LONG VERSION

Boviet Solar Technology Co., Ltd. is a leading solar technology company founded in 2013 in Vietnam, specializing in the manufacturing of advanced monocrystalline PV cells and premium Gamma Series™ monofacial and Vega Series™ bifacial PV modules. Boviet Solar’s top-performing modules are engineered for a wide range of applications, including residential, commercial, industrial, community, and utility-scale solar projects.

Boviet Solar combines business acumen, financial strength, technological expertise, and manufacturing excellence to deliver reliable, high-efficiency solar solutions to industry clients worldwide. The company is deeply committed to sustainability, supply chain traceability, and compliance with international trade standards while fostering long-term, trust-based partnerships across the global energy sector. Boviet Solar has earned industry-wide recognition for quality and reliability.

Boviet Solar has earned multiple global bankability recognitions from leading independent research and analytics organizations. The company has been consistently ranked as a Tier 1 PV Module Manufacturer by Bloomberg New Energy Finance (BNEF) since 2017, named among Wood Mackenzie’s Top 10 Most Bankable Global PV Module Manufacturers since 2024, and listed among Sinovoltaics’ Top 10 Most Financially Stable PV Module Manufacturers since 2024. Additionally, PV ModuleTech has ranked Boviet Solar among the Top 20 Global PV Module Manufacturers since 2022, while Kiwa PVEL has recognized the company’s products as Top Performers in its PV Module Reliability Scorecard since 2019. Collectively, these distinctions underscore Boviet Solar’s strong bankability, financial resilience, and long-term reliability as a trusted global solar technology partner.

Boviet Solar's global headquarters is in Vietnam, with manufacturing facilities in both the United States and Vietnam, and additional operations in the U.S., Germany, and other key international markets. The company's total PV cell manufacturing capacity is 6.0 GW, and its PV module manufacturing capacity is also 6.0 GW.
