BOVIET SOLAR

COMPANY | SUSTAINABILITY AT HEART

Purpose-Driven Progress Through Environmental Stewardship, Social Responsibility, and Ethical Governance

At Boviet Solar, sustainability is not just a goal, it is the foundation of our business strategy and corporate culture. We are deeply committed to shaping a cleaner, more equitable world by aligning our innovative-driven solar technologies with strong environmental, social, and governance (ESG) principles. Through responsible manufacturing, ethical leadership, and global collaboration, we are helping accelerate the energy transition while safeguarding the planet for future generations.

Environmental Commitment

We take proactive steps to reduce our environmental footprint and contribute meaningfully to global decarbonization efforts. By manufacturing high-efficiency solar modules using advanced N-Type and PERC cell technologies, we enable clean energy generation that displaces carbon-intensive power sources. Our production facilities adopt energy-efficient processes, emissions reduction strategies, and waste minimization practices that align with international environmental management standards.

We support the circular economy by striving toward zero-waste operations and incorporating environmentally responsible materials into our modules. Boviet Solar's modules comply with leading environmental certifications, including RoHS, PFAS, TSCA, TCLP, and EPD, ensuring low-impact, sustainable product lifecycles.

Social Responsibility

Boviet Solar is committed to building a just and inclusive solar energy future. We empower our global workforce through safe working conditions, skills development programs, and opportunities for professional advancement.

We foster a culture of inclusion, respect, and community engagement, ensuring that the benefits of clean energy extend beyond environmental impact to meaningful social advancement. Our partnerships with educational institutions and workforce development agencies underscore our commitment to clean energy careers and community empowerment.

Governance and Ethical Leadership

Boviet Solar adheres to the highest standards of corporate governance and ethical conduct. Transparency, integrity, and accountability guide every level of our organization. We maintain robust policies to ensure compliance with international trade laws, ESG regulations, and labor standards, reinforcing our credibility as a responsible global manufacturer.

We are proud participants in leading sustainability initiatives and audits, including:

- **United Nations Global Compact (UNGC):** Committed to the Ten Principles in human rights, labor, environment, and anti-corruption
- **EcoVadis:** Supporting business sustainability ratings and ethical supply chains
- **CDP :** Participating in climate-related disclosures to drive transparency
- **STS ESG Audits :** Third-party verification of sustainability performance and ESG practices

As the global solar industry continues to evolve, Boviet Solar will remain at the forefront, delivering sustainable, high-quality energy solutions that empower individuals, businesses, and governments alike. We believe that sustainability is not a checkbox, it's a continuous journey, and we are proud to lead with purpose and responsibility.
